

Press Release

**BadgePass Announces Smartcard Enrollment Integration with the
EDIsure[®] XID 8300 Retransfer Printer**

Jackson, MS – January 25, 2012 – BadgePass, Inc. and Digital Identification Solutions are excited to announce the complete integration of BadgePass’s Identity Manager credentialing software with the *EDIsure*[®] XID 8300 Retransfer Printer for single step smartcard encoding and card issuance.

Identity Manager is part of the BadgePass suite of security solutions which also includes Visitor Manager, Access Control and SmartReg. In Identity Manager, you can easily enroll user information, capture photos while also adding card information like card technology, card number and access privileges. “We saw a big problem in this industry with people having to issue ID cards in one place and activate them in their access control system somewhere completely different. We thought, why not make it easier, and more secure, by doing it all from one interface?” explains Lindsay Cornell, Director of Sales for BadgePass.

By incorporating smartcard enrollment with the *EDIsure*[®] XID 8300 printer, users can now read the card number during the print process and fully realize the benefits of single-step card issuance. “Incorporating smartcard enrollment in our Identity Manager solution allows us to fully bridge the gap between ID badge issuance and Access Control,” Cornell says.

The *EDIsure*[®] XID 8300 is an enterprise-class, retransfer card printer that was engineered to meet corporate needs. With its extremely dependable and field-proven XID retransfer technology, the printer comes ready for plug and play mag, contact and contactless encoding as well as inline lamination. The printer delivers the perfect combination of reliability, affordability and performance. “When you combine all of these things with the reliability of the BadgePass software, it really makes for an excellent partnership,” comments Bill Potwin, Channel Sales Manager for Digital Identification Solutions. “Having the ability to seamlessly enroll cards into the BadgePass Access Control system offers an enormously huge value-add for end users.”
